PROFESSIONAL EXPERIENCE

Lead Academic Tutor

2024 – Present

Tutoring & Academic Support Services (TASS), University at Buffalo

- Promoted to a management-level position to lead and supervise a team of peer tutors.
- Provide academic support across multiple disciplines, helping students master challenging coursework.
- Courses tutored: CHE-101, CHE-102, STA-119, BIO-201, CHE-203, CHE-204, PAS-313.

Teaching Assistant – BIO-201 (Cell Biology)

Spring 2025 – Spring 2026

Department of Biological Sciences, University at Buffalo

- Serve as TA under the supervision of Dr. Shaunna Phipps.
- Facilitate learning through discussion sections, office hours, and review sessions.
- Assist with grading, course material preparation, and supporting student comprehension.

Peer Mentor

2023 – 2024

Tutoring & Academic Support Services (TASS), University at Buffalo

- Mentored students in academic transition: course selection, study habits, and university resources.
- Supported students enrolled in CHE-101, CHE-102, and MTH-113.

Research Assistant

Fall 2024 – Spring 2025

Dr. Xianzong Wen's Lab — UB Maternal and Child Health Research Program (UBMCH)

- Assist in ongoing research related to maternal and child health outcomes.
- Contribute to data collection, literature reviews, and laboratory procedures.

CLINICAL & VOLUNTEER EXPERIENCE

Clinical Shadowing Intern

Summer 2024

Kenya Coast General Hospital — International Medical Aid (IMA) | Mombasa, Kenya

- Completed approximately 100 hours of clinical shadowing in radiology and surgery departments.
- Observed the impact of socioeconomic factors on healthcare delivery and government health initiatives.
- Gained transformative exposure to global health disparities that reinforced the commitment to becoming a cardiovascular surgeon.

Volunteer Service Intern

2021 – 2023

Volunteer Service Organization | Ahmedabad, India

- Assisted in outreach efforts impacting more than 8,000 individuals by coordinating donations and financial volunteering.
- Provided necessities and support to underprivileged communities in collaboration with the organization's team.

RESEARCH

Independent Research Study: Vitamin B-12 Deficiency & Pernicious Anemia

Dedicated approximately 18 months to investigating how Vitamin B-12 deficiency leads to pernicious anemia and identifying effective treatment approaches. Evaluated the critical role of early diagnosis in developing preventative and treatment plans.

PERSONAL STATEMENT

My journey to medicine was not a childhood dream but a hard-earned awakening. Coming from a business background in India, I discovered my work ethic and true calling through challenging volunteer experiences and clinical exposure — including a life-changing internship in Kenya. I now aspire to become a cardiovascular surgeon, driven by a desire to provide compassionate, equitable care and to bridge foundational scientific knowledge with advanced research and surgical innovation.
